

Special Education Services

The district offers a wide range of special education services based on the needs of individual students. These include an integrated preschool, integrated classrooms K-12, special education classrooms and transition supports. Many of our students receive special education support within their general education classrooms, while others receive support in a special education classroom. Through the Planning and Placement Team (PPT) process, the Region ensures that, to the maximum extent appropriate, students with disabilities, are educated with students who are non-disabled.
